About Us

At Barns.com Inc, we have grown through the years by helping our customers. Not just selling them any old product so we can make a sale. It is important to our owners that each of our sales persons get to know what your project is, what you need and that every single customer is the most satisfied customer. By doing this, we have been able to grow our companies and service over 33,000 customers a year. We are doing something right, give us a try and we will prove it to you too.

Barns.com was created to simplify shopping for your choice of barns, horse barns, metal barns, barns, sheds, outdoor storage, sheds storage, garden sheds, storage structures, garden sheds, outdoor barns, tool sheds, outdoor sheds and other related outdoor structures.

Our family of related websites include many nationally well known and visited destinations such as, Carports.com, Barns.com, and ShopByPicture.com, that provide a wealth of information, pictures and user-friendly online builders so that customers may get estimates 24 hours a day, 7 days a week. We are dedicated to providing you with the best products and service in the metal structure industry.

Barns.com and it's network of online stores are owned and operated by Barns.com, Inc., a sister company of T-N-T Carports, Inc. T-N-T Carports, Inc. is headquartered and main manufacturing facility is located in Mount Airy, North Carolina. T-N-T has grown from a small family business to a full staff of over a 150 employees.

T-N-T Carports, Inc. was built and has grown due to its integrity, honesty, customer service and product diversification and stability. T-N-T Carports, Inc. has grown to be one of the largest outdoor structure manufacturing and retail companies in the United States with representatives in 48 states.

Why Barns.com?

We cover more than 150,000,000 square feet (every year) with barns, horse barns, sheds, outdoor storage, built on site barns and other commercial barn buildings. We have any option you're looking for, along with the name and brand you can trust. When you order a product that will last for years, you want a company that will be there for you, support the product you buy and stand behind it. You can count on Barns.com and our friendly staff to provide A+ service.

Heat Absorber

Have you ever thought about the heat that builds up in your structure? We have too... That's why we are bringing you a new technology called the HeatAbsorber™. This technology literally absorbs the heat inside of your structure which in turn keeps the temperature inside your structure more consistent. Will it air condition your structure? No, but it sure does help maintain a lower temperature in the sun. The best thing about it is, it's free to each customer who orders from Barns.com! Just pay S&H.

EXCLUSIVE

HeatAbsorber™

Great for comfort... During the day heat builds up quickly in a structure. By using our patent-pending HeatAbsorber™ panels, you absorb that heat and maintain a more comfortable temperature inside your structure. The panels contain non-toxic ingredients that absorb the heat before it reaches you!

Keep a more consistent temperature... Have you ever walked into a building that is not air-conditioned? Unless it's a cloudy day, when you walk inside, it can be extremely hot inside. By using the HeatAbsorber™ panels, you get a more consistent and lower temperature throughout the day.

Prevent over heating... Help prevent animals from over-heating while hanging out underneath your metal structure. Our exclusive technology that absorbs heat helps maintain a cooler environment inside your structure during harsh outdoor temperatures.

Save money... from not having to air condition your structure as much!! Yes, our heat absorbing panels help keep the temperature down and more consistent so your air condition (if you have one) doesn't have to work as hard! Use our free HeatAbsorber™ panels to help keep the heat down and protect from the harsh heat build-up.

Easily remove the heat absorbing panels anytime... The HeatAbsorber™ panels are easily removable at anytime. The panels are applied using a simple peel n' stick adhesive method.

Other possible uses ... We invite you to be creative with the HeatAbsorber™ panels. We designed the panels so they can be cut into many sizes to fit other places without much effort. Place a few in your vehicles to soak up some of the heat during the day, or stick a few under the roof of your dog house to soak up that harsh heat! Have an idea to share? Visit www.HeatAbsorber.com and share your usage...

Uses no electricity... HeatAbsorber™ panels is an all natural non-toxic chemical reaction that uses no electricity, or power!

All green, Non-Toxic, safe around animals/children... Keep a safe mind without having to worry about the technology accidentally coming into contact with animals, wildlife or children... 100% non-toxic, and non-flammable materials! HeatAbsorber™ is completely eco-friendly and non-toxic...

Made from 100% recycled materials.

Horse Barns

Finding a quality built and long lasting horse barn is a very important decision for any horse owner. Barns.com will custom build your engineered barn structure to fit your needs. Give us a call toll free 888-812-2767 to get a written quote guarantee.

Horse Barn Sizes Available:

Widths: 12' up to 80' Wide.

Lengths: 21' up to 500' Long.

Check out our Virtual Tours on www.Barns.com and see detailed tours.

(see page 3)

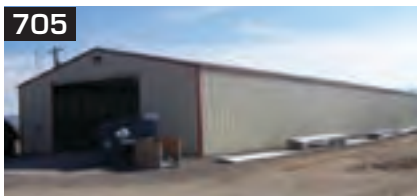

Commercial Buildings

We design, deliver and install large commercial steel buildings that require custom engineering, snow/wind ratings, etc... in 48 states across the United States. Give one of our specialists a call toll free at 888-812-2767 or look-up your local number on the back cover.

All of our buildings come with an option of either 14 gauge or 12 gauge galvanized steel tubing to prevent rust and disable possible corrosion that will happen with most red-iron structures.

- Engineered drawings available upon request for small additional fee.
- Able to Meet Custom Wind Ratings and Snow Load Requirements.
- Delivery and Install averages within 1-4 weeks in most states after ordering.

Custom Engineered

Custom engineered structures are often the product of choice by our customers. If you need a custom size structure, we are happy to design a structure to fit your desires and technical requirements. Here are some examples of previous custom projects. No size is too small or too large for Barns.com.

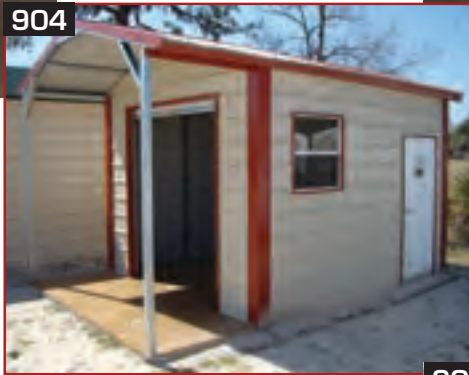

Our name may be Barns.com, but we do far more than just barns.

Give us a call with your custom project..

Mini Barns

A miniature barn for your backyard is the perfect storage solution and easy way to make more room in your home or business. We have many styles and options for mini backyard barns and sheds.

Nationwide Service*

Frequently Asked Questions

Your website is Barns.com, do you only offer “Barns”?

The simple answer is no, we offer much more than a “barn” like structure. Barns.com is the factory direct source for almost any type of engineered outdoor structure built of high quality, galvanized steel. We service the United States offering long-lasting steel products that will last decades. Building sizes range from 12 feet wide to 80 feet wide, and from 12 feet long to 500 feet long or more. Whether you are looking for a custom metal garage, an engineered steel building, a horse barn structure or a simple loafing shed - we will be glad to give you a written price guarantee. Our corporate offices are located inside the galvanized steel tubing factory, and we’re more than glad to pass along the savings to you by ordering factory direct from us.

Is there any type of warranty?

Yes, each manufacturer offers a standard structural integrity warranty. Because we offer several different brands and collections of barn products, we suggest you to call us to discuss your specific warranty questions. All of Barns.com Certified Structures come with an exceptional warranty you can’t get anywhere else! We stand behind our products, which has caused our company to become the leading retailer for steel structures in the USA.

How long does it take to get my order?

Typically our scheduling offices are able to get your structure installed within 1 to 4 weeks of your order date, sometimes quicker, sometimes longer. It varies due to weather conditions in your local area.

Are there any hidden costs, like delivery?

There are no hidden costs in delivery or pricing. Our structures include delivery and installation when you get your written quote guarantee. Everything except add-on options is included, except tax if applicable. Add-on

options include items such as windows, walk-in doors, garage doors, custom frame-out openings, and etc. Most companies will give you a “drop off” price (we can do also) but it only saves you about 10%. Our trained installers deliver and setup metal structures every day and are less likely to make a mistake as someone would if they were installing it themselves. If our installers make a mistake, we cover it! If you install it and make a mistake, it's your fault!

Can I have walk-in doors, garage doors or custom openings?

Yes, Yes, and Yes... All walk-in doors, garage doors, windows, custom framed out openings, and other add-on options can be added and usually located exactly where you want them on your custom order as long as there is room within the size (width or length) of building you are getting a quote on.

Is there a different price for different roof styles?

Yes. All of our brands offer three different roof styles. Regular Style Roof, A-Frame Style Roof, and A-Frame Vertical Style Roofing. See page 19 for our roof styles.

How long will the sheet metal and steel tubing last?

Sheet metal paint will last a good twenty to thirty years before it starts to fade. It is extremely durable and is rust resistant! Our galvanized steel tubing is rust resistant and certified to last for decades. Unlike wood, galvanized steel tubing requires NO maintenance. Never worry about staining, mildew, or curing (warping when the wood dries out). Sheet metal and steel tubing is also resistant to rot, bug/termite resistant, etc...

Frequently Asked Questions

What type of maintenance will I have to do?

The good news is the products you order from Barns.com will be fine for decades without doing anything. Enjoy the benefits of an affordable engineered steel structure!

Do I have to worry about getting a building permit?

Barns.com does not obtain a building permit for customers. It is up to our customers to order a building permit (only if necessary or required by your local building codes). All of our certified structures come with engineered drawings guaranteed to pass for your county/city building codes or you get a full refund for your building (except the down payment which is non-refundable when you place your order). To play it safe, call your local permitting office to find out if it is required to get a building permit for the size structure you are building.

Is the floor included?

Some of our "mini" backyard barns/sheds include a wood floor though. Most of our structures do not because each customer has different plans for floors. Some customers want concrete, some want a wood floor, and some want gravel or just ground. Some of our small storage buildings do have the option for a wood floor, call and ask.

Will I have to level the ground when the structure is installed?

Yes, Our delivery and installation crews will not level the ground for your structure to be installed properly. We do not bring out equipment to do grading or leveling of your land. If you have questions about the leveling of your land or lot, please give us a call toll free at 888-812-2767 to talk about your specific situation.

Can I save money by ordering from a local builder or Barns.com?

It is easy for us to say you will save more money by ordering from Barns.com, but honestly Barns.com is the factory direct retail store. Our corporate offices are located inside the galvanized steel tubing factory. Why involve a middle man when you can order factory direct through Barns.com.

Can I add on to my structure later?

Yes! In fact, we often take add-on orders to customer's structures. Our structures are engineered with your needs in mind. Most likely, even if you order a larger size than you think you will need, years down the road you may outgrow it. You don't have to worry about selling your building or finding someone who can carefully match up the same colors and same engineering style... Give us a call a year down the road and we'll be happy to come back to add-on to your structure.

Is insulation available for my structure?

Yes! We offer insulation with every structure as an add-on option.

Do you offer barn stalls?

No... We do not offer a standard barn stall but upon request we can do a custom metal frame out in the structure and make multiple custom size framed-out openings on any side of your structure. We specialize in engineering the structure and building a quality building for our customers. The finishing touches such as a door for your horse or other livestock can be installed easily after we install your structure. If you looking for a standard 12x12 stall, don't sweat it... You can find many options for add-on stalls online and can often get ideas from our certified barn specialist at our factory (Toll free 888-812-2767).

Roof Styles

Although, it may seem like we have many different roof options, all of our products are based off three different roof styles. Our more affordable roofing style is our Regular Style because it uses less metal and is less labor intensive to install.

191

Regular Style Roofing

Sheet metal runs from the front of the structure, to the rear. The roof has a rounded appearance.

Water runoff is on the front and rear of the structure.

192

A-Frame Style Roofing

Sheet metal runs from the front of the structure, to the rear. The roof has a "A" shape appearance.

Water runoff is on the front and rear of the structure.

193

A-Frame Vertical Style Roofing

Sheet metal runs from the front of the structure, to the rear. The roof has a "A" shape appearance.

Water runoff is on the sides of the structure.

Doors, Windows & Anchors

Our metal barn and building structures allow customers to place garage doors, walk-in doors, windows and custom-size frame-outs in almost any place. Each having custom installed trim (your color choice) for no additional charge. Garage door sizes vary depending on area. We also design custom frame-out openings so you can install the door yourself if desired.

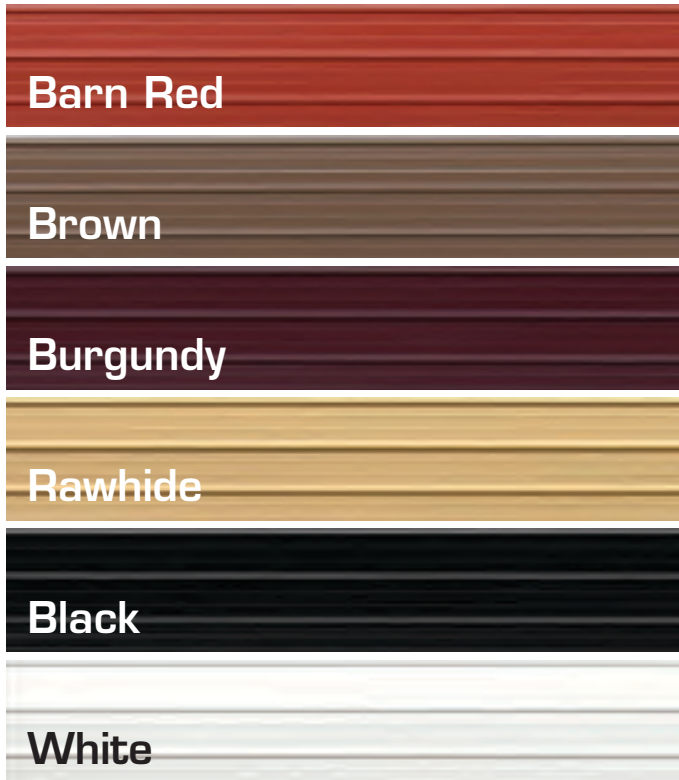

Mobile Home Anchors

Concrete Anchors

Color Choices

Barns.com offers 12 colors for you to choose from. Choose up to three: Roofing, Sides/Ends, & Trim.

Tubing & Engineering

Barns.com manufactures its steel tubing in the United States. All of the steel tubing is galvanized to prevent rust and any corrosion like most red-iron structures will be subject to if not properly maintained. Our steel structures are maintenance free due to the galvanization process which adds several layers of protection to the steel. Every detail is closely examined to make sure our products are built to last through decades of harsh outdoor conditions.

Engineering is an important feature that customers often take for granted in our day to day activities. Our certified structures are examined and tested by licensed engineers to ensure each product holds up to local code regulations.

weather.com

Our products were even tested by the Weather Channel® in 2010 and passed every test! One of our structures were subjected to a simulated hail storm, multiple loads of frozen solid grape fruit dropped from a 7-story building at Universal Studios, and 15 bowling balls! We are extremely proud to stand behind all of our structures, even though Mother Nature can be really harsh throughout the years.

Delivery & Installation

You may place your order with as little as 10% down. Delivery and installation average between 1–4 weeks after your order is placed. This varies depending on your local region and also your local weather conditions. It is our goal to have your structure installed as promptly as possible after your order is ready in our factory. After all, we do not get to collect the remaining balance of your structure until you are completely satisfied with your delivery and installation.

We make it every priority to get your structure installed without delay, for your satisfaction but also so we may get paid as well... Our delivery and installation crews located throughout the United States are well trained and install our structures everyday as their career.

**Delivery & Install:
Average of 1 - 4
weeks after ordering.**

221

222

Our installation crews are equipped to install free span structures up to 80 feet wide.

223

Testimonials

Thanks for the email. The installation was completed to satisfaction and at the present time there has not been any issues. It was nice doing business with your company and will keep you in mind for any other future purchases that fall within your arena.

- *United States Marine Corps,
Directorate of Emergency Services*

Thank you for the follow up, so few companies take the time or even care what happens to their products.

Yes indeed, the unit is set up and I am completely satisfied with it. The materials are first rate and everything fit perfectly. As an engineer (retired) I appreciate the thoughtful design that went into it.

Again, thanks for your concern and keep up the good work.

- *T. Amlick*

I ordered on 1/14/08 and it was installed on 1/24/08. The guys were very efficient and professional. Thanks for the quick service.

- *Ron
Crisp County School System*

We ordered 2 structures from you, 1 garage/shop, and a car cover. Both have been installed and we are very Happy to have both units. The Installers were Great also ! Thank You !!

- *Rick O.*

Yes they installed it early and fast. I'm interested to see about adding a shed to one side 26' wide by the full depth.

- *Sent from my BlackBerry® wireless handheld*

Thank you! I am very pleased with the barn. It was installed about a month ago. Thank you for your time to follow up with us.

- *John*

The Group doing the install were VERY fast. The installation was great and there were no issues with the product.

- *David*

My Barn was installed yesterday evening. The delivery/installation crew was courteous, efficient, and helpful. Thank you for the good service.

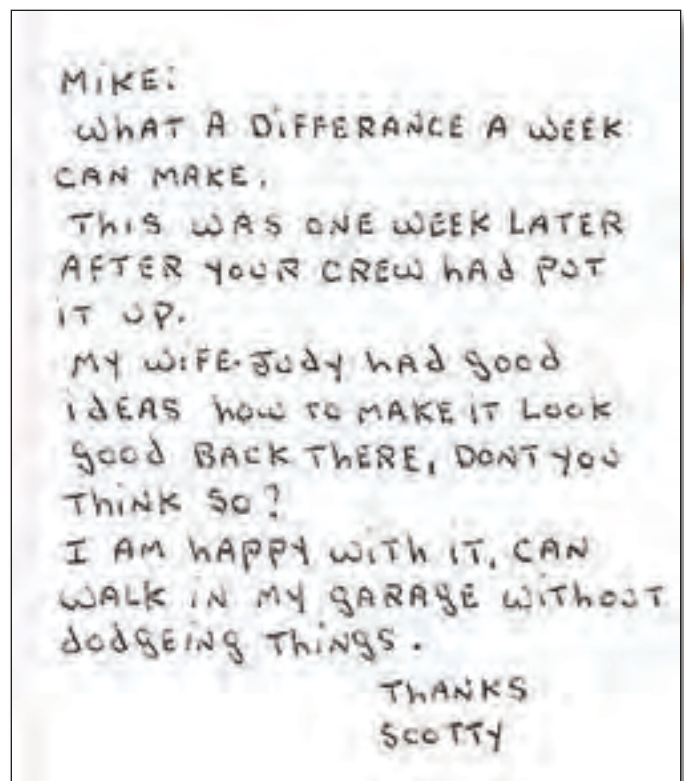

- *Andre*

Yes, our barn is for storage at our emergency vehicle located at our Charleston plant site.

- *Mike*

Our barn structure has been installed and it is wonderful! Our teachers and students appreciate the extra storage area.

- *International School of Louisiana*
